The Unauthorized Disclosure Analysis Center

The Unauthorized Disclosure Analysis Center will be a resource of common concern for those empowered to conduct such investigations. It will also serve as a focal point for support to the Unauthorized Investigations Subcommittee and the Chairman of the Security Committee. It will have no unilateral investigative powers.

As conceived, the Center will assemble for ready retrieval all known elements regarding current unauthorized disclosures of intelligence sources, methods and product. By centralizing reports of such disclosures the Center will help in reducing redundant research and investigative efforts by multiple agencies. In addition, through content analysis and exploitation of other reference tools its personnel will seek to isolate for investigators breaches that are new from those already in the public domain through earlier revelations. The Center will serve as a test bed for analytical techniques to improve the focus, to provide leads and to increase the effectiveness of investigative efforts. Emphasis will be given to those dissemination and disclosure patterns most susceptible to successful investigative resolution.

Through its analytical efforts and the suggestions of Community members, the Center will seek to develop immediate defensive procedures and long-term protective techniques. It will be a reservoir for those conducting security awareness programs and will strive to develop both educational materials and, where possible, sanitized case histories for their use. Its comprehensive search capability will be used to respond to inquiries from senior managers and policy makers, to prepare consistent periodic reports and statistics and to furnish sound justification of recommendations for administrative and legislative relief.
